

DATASHEET FOR COLLECTING MACROFUNGI

Arizona Mycota Project (<http://www.azfungi.org/amp/>) in conjunction
with the *Robert L. Gilbertson Mycological Herbarium*, University of Arizona (ARIZ)

Collector's name:

Date:

Address:

Telephone number:

Email address:

Collection number (if you keep a log of your collections, give number here):

State in which collection was made: Arizona

County:

Locality (give precise location relative to fixed landmarks, and latitude, longitude, and altitude if possible):

Describe collecting site (Forest? Open grassland? Name, if possible, dominant plant species):

Describe substrate (Fallen wood? Standing snag? Living plant? If possible, give name of host species; use question marks if you are not sure. Note condition of host: very decayed, mostly intact, dying. If soil, please excavate **very** gently to see if fruitbody is emerging from buried wood):

Notes about site (are fruitbodies common? Are many fungi fruiting in the area? Has the area burned recently? Is there evidence of anthropogenic disturbance?):

Estimated species ID:

Species ID based on... (field guide, spore print, chemical characteristics, previous experience, or combinations of these or other factors):

Notes about fresh specimen (color, condition, scent, texture)
